We completed the first Corporate Finance transaction in 1995, advising Service Point Solutions on a capital increase in the securities market. Since then we have continued to raise the bar year after year. We have now established ourselves as one of the leading independent Spanish companies in domestic corporate transactions, holding 6th place in the ranking list for transactions of up to 50 million Euros, as published by Thomson Financial.

In the last five years the Corporate Finance team of the Riva y García Financial Group has provided continuous consultation to 50 companies, analysing approximately 100 transactions.

The corporate market in Spain offers good opportunities. Following the withdrawal of the major investment banks to London and Paris, the domestic corporate middle market has been left open. In addition, the boom in Private Equity means that we can expect to see periods of divestment which will entail the need for our consultancy advice.
